

MIRA SHAH

Data Engineer

PROFESSIONAL SUMMARY

I build warehouse models for logistics teams. My work connects parcel scans to delivery reports so dispatchers can trace an exception to the source. I own ingestion, reconciliation and the handover to operations.

PROFESSIONAL EXPERIENCE

North Quay Logistics **2022 — Present**

Data Engineer

- Define event keys and reconcile duplicate scans before publication.
- Write replay jobs for late files from carrier partners.
- Build daily depot capacity tables for dispatch planners.
- Review schema changes with operations before each release.
- Maintain incident notes and handover checks for the next shift.

Oakline Analytics **2019 — 2022**

Analytics Engineer

- Built order-level reporting models for retail clients.
- Reconciled warehouse totals with the finance ledger.
- Documented recurring discrepancies with client analysts.
- Handed over checked datasets with release notes.

SKILLS

- SQL and Python
- dbt and PostgreSQL
- Data modelling
- Pipeline monitoring
- Event reconciliation

EDUCATION

Westmere University

BSc Computer Science

2015 — 2019

- Final project in transit data.
